

## Hope For This Year's Harvest

AS ONE OF THE GREAT wheat producing nations Canada, and particularly the people of the Prairie Provinces, cannot but be at all times deeply interested in the world food situation, for economic conditions here are to a large degree dependent on the demand on foreign markets for the products of our farms. Wheat, which is also known in many places as the "bread grain" is always regarded as being of great value in sustaining life, and is particularly essential when other foods are scarce. At the present time there is an acute food shortage in the world, and a great deal depends upon the success of this year's harvest on the wheat farms of North America. Britain, which is managing on very limited supplies of food, has little hope of a good harvest this year because of the storms of unprecedented severity which buffeted the country during the winter and early spring.

**Situation To Be More Acute**

As a result of these storms Britain will have to depend upon shipments from other countries for food supplies in the coming year. In Europe, and particularly in Germany serious food shortages are occurring and many observers predict that even more serious situations will arise in the next few months. In regard to conditions in Germany, there are many people who look upon the present plight of the people there as a direct result of their own actions. There are also many who believe that the Germans should not expect help from abroad, in view of the misery for which they were responsible when their armies swept over Europe. This has been a controversial subject ever since the defeat of Germany. Disregarding the moral aspects of the problem, however, it must be admitted that we can hope for neither economic stability nor permanent peace until we in any part of the world are without food.

**Should Receive More Attention**

Lack of food is looked upon as one of the most common causes of political unrest, and recent events have demonstrated only too clearly that political instability abroad can seriously affect our own prospects for progress and security. The fact that we are without doubt living in "one world" and that the problems and distress of any one group of people cannot be safely disregarded, has not yet been fully realized and seriously considered by everyone. That fact, however, remains one of the fundamental truths of our times, and unless it is given serious thought, many of our present plans for the peace and security of the world will, of necessity, fail. Great hope is centered this year on the wheat harvest in this country, and it is to be hoped that there will be a heavy crop, and that through it Canada may be instrumental in averting a real disaster throughout the world, and particularly in Europe, during the coming year.

### Fashion News From London

Bell-like skirts supported by stiffened canvas petticoats, off-the-shoulder neckline and amazzone waists are features of summer fashions that are coming into production in Britain's dress industry. Vivacity of design and suppleness of line and detail characterize the prototypes of summer dresses. Pale pink marcelle—a fine cotton—brings sophistication to the summer dress in one model; another has been made in a navy and white checked duster cotton model completed by a fitted corset waist and a belt. A third model in sharkskin is being used for tailored dresses highlighted by belts of bright-colored webbing, and white marcelle is used for a tailored beach suit. Length shorts (goddement turns up the feature of these) and a bare midriff ("monkey" fashion with sleeves and corset front cut in one.

### WAR GRATUITIES FOR ROYAL INDIAN NAVY PERSONNEL

Ex-Royal Indian Navy Officers who were discharged in India before 8th May, 1945, and proceeded later to the United Kingdom, or other destination outside India, are to receive the same gratuity as War Gratuity and other Terminal Emoluments to the Accountant-General, India Office, London, and not to the Commanding Officer, H.M.I.S. Feroze, Bombay.

### FUNNY And OTHERWISE

"What's the most effective agency for the redistribution of wealth?"

"The wives and daughters of rich men."

"Which would you prefer in your future husband—wealth, ability, or appearance?" asked the pretty girl.

"Appears, my dear," replied the spinner, "but he's got to appear pretty soon."

"Tattered trim! I've been tramm'd! I'm a widow, ma'am, and it's all 'cause I heard that the doctor recommended walkin' as the best exercise."

"Mrs. Prim: 'Well, the doctors are right. Walk along.'"

"Nigro Mammy—Ah wants to see Mistah Tompkins."

"Officer Boy—I'm sorry, but Mr. Tompkins is engaged."

"Nigro Mammy—Go 'long chile. Ah don't want to marry Mistah Tompkins. Ah jest! wants see him."

"Employer: 'Why are you throwing those hands on the pavement?'"

"Bill Distributor: 'Well, that's what the people do. I give 'em to. So it's only saving time.'

Ductor (after examining patient)—I don't like the looks of your husband, Mrs. Brown.

Mrs. Brown—Neither do I doctor, but he's good to our children.

"Mary," said her mother reprovingly, "every time you are naughty, I get another grey hair."

"Mom, you don't have a terrors when you were young—just look at Grandma!"

Judge O'Flaherty: "Haven't you been before me before?"

Prisoner: "No, I'm honor. Oh, mister, but your face that looks like yours can't have a photograph of an Irish king."

Judge O'Flaherty: "Discharged! Call the next case."

It was a concert in aid of the Children's Fund. A lady whose voice was simply appalling had just finished her song. Mrs. Brown almost had a fit when he found his wife was applauding her boisterously.

"What on earth are you clapping for, have you gone mad?" he cried.

"The woman's voice was simply awful."

"Oh, but her dress is lovely," cried her wife, "and I want to have another look at it so that I can give the dressmaker hints upon making mine."

Two friends (one married, the other a bachelor) were at the latest play, admiring the performance of a famous actor.

"By jove," the married man murmured, "he's grand; he's wonderful. The boy does display a certain amount of the learning, my boy."

"Yes, pretty good," the bachelor agreed. "But you know he's been married to her, actually, for eighteen years."

"What? Really married?" gasped the married man. "Gosh—what an actor!"

**B.C. ARCHITECT DESIGNS HOMES TO SAVE STEPS**—Mrs. Catharine Wissick, wife of a Polish air force veteran and British Columbia's only registered woman architect, is shown here with her six-month-old twins. She graduated from McGill university at 23 with a bachelor of architecture degree. Living at present in a rented home, she hopes to build of her own. Her idea of a home is a design for living and working in a home; her advice: do not choose haphazardly from magazines, but benefit from everyday observation.

**TWO MISS DEATH**—Tragic accident on the Bulkley river, near Telkwa, B.C., caused the deaths of Gerald Spence, 10, and his brother, Arthur, eight. June Spence, 19, is seen with her other brother, Michael, four, whom she managed to save when their rowboat capsized in flood waters. Telkwa is 200 miles north of Prince Rupert.

### SNOW GESE RETURN AFTER PLANES LEAVE

**WINNIPEG**—Blue and lesser snow geese will soon man Lake and rivers this spring on their flights northward—the first time they have done so since R.C.A.F. gunnery and bombing schools became active four years ago.

After the establishment of the R.C.A.F. schools, particularly at Macdonald, the geese rested in the Dakotas and Iowa, and then flew nonstop to Hudson Bay. Last year there was no small flight through Alberta, the first such recorded.

With war-time flying activities ceased, naturalists are hoping the geese will resume their normal route. But B. W. Cartwright, chief naturalist of the University of Manitoba,

If Canadian imports were banned it would nearly £3,000,000 (£12,000,000), The Standard said. It added that at this time last year arrangements for buying the 1946 crop were well advanced but that this year no action had been taken on the 1947 crop.

**SAYS PARENTS NEED**

### SUNDAY SCHOOL TRAINING

**WASHINGTON**—The main committee, Miss Bertha L. Clegg, has reached after 60 years of Sunday School teaching is that parents need religious training as much as their children.

Her observation is based on classes she now conducts every Sunday at the First Baptist Church and weekday visits she makes to the parents' homes.

"Sunday school teachers," she believes, "should stress the memorizing of the Scriptures, for they will stand by men and women throughout life."

To Feel Right—Eat Right!

### Uses Drastic Means In Trying To Regain Husband's Love

**WILMINGTON, ENGLAND**—Mrs. Lucy Wright, 20, was bound over for two years after admitting that she tampered with a tractor driven by her husband in the hope that "Bert would break his neck."

Later she explained to a reporter: "I love Bert."

"He means the world to me. Every time I see him he has a wonderful effect on me; but he won't have anything to do with me. A year ago he left me because of a quarrel and we haven't been together since then."

"I tore some loads from the tractor. I imagined Bert being seriously hurt. That horrified me—but most important of all I imagined myself getting him again, with him finding me once more. That's why I did it," Lucy's third husband, commented: "Lucy shouldn't tamper with tractors. It makes things difficult."

### Britain May Not Need Canadian Apples

**LONDON**—The Evening Standard said that if the British apple crop fulfills expectations this year it may be possible to do without apple imports from Canada.

If Canadian imports were banned it would nearly £3,000,000 (£12,000,000), The Standard said. It added that at this time last year arrangements for buying the 1946 crop were well advanced but that this year no action had been taken on the 1947 crop.

### FORECAST FEATHERS FOR FALL MILLINERY

Feathers replaced flowers as favorite adornments in the midwinter millinery parade held at the Melbourne Town Hall. The forecast fashion trends for the Australian autumn and winter seasons.

Australian designers showed it's always popular to start something new in women's hats by featuring models of every color, shape and size. The trend is for off-the-face hats, in striking color combinations, while feathers are most frequently used.

Velvet is still popular, worn over the face to give a mystic air, under the chin, or hanging like a barding.

### ORIGIN OF SAYING

What is the reason we say a task is "as easy as duck soup"? A pond or puddle of water is, by a humorous analogy, called "duck soup". A pond caused by rainfall will materialize with human effort. Thus "easy as duck soup" indicates a project requiring no special effort.

Most of the streets in Lima, Peru, have different names for every block.

It has a five-bladed propeller which revolves at a slower speed than a conventional one. The new propeller reduces noise pressure 90 per cent.

In the demonstration, a plane with a propeller and muffler made scarcely more noise than a glider when at a 300-foot altitude, listeners on the ground said.

The rackets of planes overhead cause some concern near airports to decline in value and has brought a number of lawsuits.

J. A. Short, project engineer for NACA, said the plane demonstrated was the first one built in which all silencing methods had been applied.

## WORLD HAPPENINGS BRIEFLY TOLD

Winston Churchill has purchased 43 shorthorn cattle to add to his herd at Chartwell, Kent.

Two butchers in Bristol, England, who used an electric fire to thaw out meat were each fined £2 (\$8) for wasting electricity.

Forty men, women and children were killed in a building northeast of Cairo when their boat skidded and plunged into a canal.

Sir Frederick Gowland Hopkins, 85, a Nobel prize winner and generally acknowledged to be the discoverer of vitamins, died recently at Cambridge.

Pieces of pottery made by Lucius and Mummos—potters of southern Gaul in the reign of Tibur and Nero—were found at Canterbury, England, during excavations of Butgate Street.

Stockholm's population increased by 18,507 in 1946 and at the beginning of the year numbered 690,108. The increase was caused by 11,000 persons moving into the capital and 2,000 new births.

7120

ROYAL FAMILY HOME—Home again after their 23,000-mile tour of South Africa, the royal family is shown near the gates of Buckingham Palace. Carriage is passing section of Queen Victoria memorial. Palace circles say engagement of Princess Elizabeth is next event.

### Whaling Harvest Exceeds Expectations

Britain is bringing back from the Antarctic a rich harvest of whale oil, meat, meat for cattle feed and meat extract. The season has been remarkably good. The whaling "Barham" was fortunate in securing the highest proportion of whales and edible oil. Owing to the fact that at the present world needs are the most critical ever known, no less than 11 different operations have been taken in Antarctic waters. More than 2,000 whales were caught by United Kingdom crews, 185,000 barrels of oil were produced in addition to sperm oil and other by-products. Another way in which the experts are making history is in the pioneer use of aircraft for whale spotting and for weather reconnaissance.

### Green Cross 5% DDT RESIDUAL Household Spray

A sure end to flies, mosquitoes, moths in houses, camps, restaurants, etc. One spraying properly applied to walls, doors, ceilings, etc., will kill insects landing on it for weeks. In addition to DDT contains a quick knock-down agent. Non-staining—no unpleasant odour and safe to use.

\*Trademark Reg'd.

**She's The Most Attractive Mother In Hollywood, Is Tribute To Jane Wyman**

Hollywood's most attractive mother was the title given Jane Wyman by Society of American Florists. She is made up for screen. Mother of two children and expecting a third, Actress Jane Wyman is seen with her husband, Actor Ronald Reagan, and their two children.

## Doctor Admits Taking Life Of Incurables

LONDON.—Dr. E. A. Barton, pleading for an incurable sufferer's right to die, said in an address recently that he had taken the life of such a patient.

The physician, who retired after 40 years as a general practitioner in London, told the Voluntary Euthanasia Legislation Society:

"We know what things are done, but they are not done legally. We are extremely cautious in shouldering the responsibility in taking a patient's life. I am not ashamed to say that I have done so. And I know medical friends of mine of the most sound, parent honesty who have confided to me that they had to give way to a patient crying for mercy."

"It is we, the general practitioners, who are willing to accept the heavier responsibility—the taking of life—and risking our status as doctors and risking our necks if it comes into the courts."

"But we must divide that responsibility. We must not be asked to rest upon one set of shoulders."

A Percy Groves, chairman of the society, said a "Right-to-Die" Bill for persons suffering great pain in incurable illnesses would be introduced in Parliament at the earliest opportunity.

Dr. Barton said in an interview after his speech that he had written an autobiography in which he "described some of the appalling horrors cases I have met where the disease and the patient's life dragged along in conditions of dreadful pain and misery."

"Every doctor has similar experiences," he said. "Several of my patients highly educated people—men from the Royal Academy at one time among my patients—have begged me to end their lives when their suffering was unbearable..."

Handball, a game of Celtic origin, is suspected to have been one of the ancient Taitlin games of Ireland.

## Child Blind Since Birth Able To See

NEW YORK.—An auditorium at Georgetown, British Guiana, is going to have one of the strangest names any auditorium ever had—all because a 14-year-old Georgetown girl, blind from birth, now is able to see.

The story of the strange name was told at the New York Eye and Ear Infirmary, where Mary

is getting her first glimpses of a hitherto unseen world—and finding it frighteningly bright.

Mary, one of seven children of Harry Mayers, assistant bandmaster at Georgetown band, is a soprano and concert concert at home to help raise the money for her trip and operation.

The operation required transplanting cornea to Mary's left eye. On March 30 she entered the New York Infirmary for the operation.

When the bandages were removed from her eye, Mary was flabbergasted she couldn't say a word," her mother, Mary, complained she was frightened because the light was "so much brighter than I thought it would be."

Then she looked up at her father, who was imposing in his bandmaster uniform. "My daddy's a very handsome man, isn't he?" she said.

The folks back home are so grateful, they have notified Mary that she can come home again when she sang for her chance to see on Nov. 10 it will be.

The New York Eye and Ear Infirmary—Auditorium."

## STREET WAS NAMED AFTER AN AMERICAN

Downing Street, London, where the Prime Minister lives, derived its name from George Downing, an American. Born in Salem, Massachusetts, he was graduated from Harvard with the first class in 1642, and went to England where he served as Ambassador to the Netherlands. Charles I, Cromwell, and Charles II. The street is presented with a large parcel of land in Westminster, of which Downing Street is the memorial.

## TEMPS FUGIT

## Many Good Ideas In New Inventions

The question "what's new?" has more than 600 answers in a new digest-style magazine.

They are contained among ideas listed in the "Digest of New Inventions," published by the National Foundation for Science and Education.

Alfred Babcock, who launched the foundation last July as a non-profit clearing house to help bring inventor and manufacturer together, reported ideas now swelled from every state, Canada, the Panama Canal zone, and from far-away Guam in the Western Pacific.

Mrs. Ida Price, Marked Tree, Ark., submitted a combination ashtray and cuspidor for cigar smokers in the earth which has no place to dispose of ashes.

A sample of the ideas arriving from Canada was a grain "stoker" from F. W. Torrance of Hamilton. He described it as an automatic attachment for a grain binder capable of handling 100 bushels of grain "stocks" having eight to 10 shelves.

Babcock said he had expected at first to receive many "crock-pot" inventions which never could be produced commercially, but had discovered these were in an extremely low percentage.

## Many Taboos At Ascot Race Meet

There are many taboos at the famous Ascot race meet in England. For instance, if a member of the Royal Family comes down from the Royal box, no acknowledgment must be made of the fact. A woman doesn't wear jewelry in the Royal Enclosure, and it is considered an infringement to wear pearls, because by tradition pearls are the only jewellery worn by the womenfolk of the Royal party. Camars are barred, and even people with sketch books are likely to be asked to leave the Royal Enclosure.

The harrying of divorcees from the Royal Enclosure, says the London Star. This is of the days when divorce meant social ostracism, and divorcee's rule was the law of the land among the upper classes. However, the most notorious taboo is the barring of divorcees from the Royal Enclosure, says the London Star. This is of the days when divorce meant social ostracism, and divorcee's rule was the law of the land among the upper classes. However, the most notorious taboo is the barring of divorcees from the Royal Enclosure.

## Food Outlook Is Not Encouraging

While the number of "displaced persons" has been reduced since the war ended from 12,000,000 scattered

over the Atlantic coast of Europe to 3,000,000 today, there are still 834,000 requiring relief states the Ottawa Citizen. Then the Germans have reached the stage of food counterrevolution and even striking, against the Allies. Military government for not giving them as much food as they consider they are entitled to. And this, though some of the shortages are due to the failure of the German administration to meet their responsibilities. They persistently describe the food situation in Germany as far worse than it is.

However, one thing is certain and that is that except in Canada and the United States food is plentiful and in all probability the harvests of 1949.

Nero Deep, near the island of Guam, is about six miles deep.

Combining her successful film career with the distinction of being one of the movie colony's best mothers, Jane Wyman is seen as she plays with her daughter, Noreen.

## NATURE DOES NOT ALWAYS SUCCEED

### Tried Twice To Give World Sabre-Tooth Cat

Nature is a determined critter. For instance, she tried twice to give the earth a sabre-tooth cat.

She had her first fling at it 40,000 years ago, give or take a few weeks, in the Smithsonian Institution, recorded recently.

This creature was known as machaerodus eohanis to its friends and relatives, and was about the size of a house cat.

What happened? In no time at all, say 10,000 years or so, tatty became extinct.

Well, you know how it is with women. Nature didn't give up.

The next time it was the sabre-tooth tiger. He was no relation to machaerodus eohanis, and he was built along the same general lines, but much bigger.

He lived in the ice age, and hence was a Johny-come-lately, the way the Smithsonian scholars measure time.

But the tiger fizzled out, too, and Dr. C. Lewis Gasin, vertebrate paleontology curator, told a reporter that nobody knows why for sure.

Climatic conditions change, animals are forced to migrate, and the first thing anybody knows is nature's balance wheel is out of kilter.

The sabre-tooth tiger, for instance, with its protruding tusks, was mighty handy at carving up mastodons. Gasin suspects that when the mastodons disappeared so did the tiger's lunch.

As for the other, Gasin doesn't even have an extinct theory,

### REST THE EYES

Rest your eyes at frequent intervals, don't strain them, sit at a blank wall, or some distant object. Use your eyes sparingly during illness or convalescence when they are particularly susceptible to fatigue, and always read with adequate, well-arranged lighting, not in bed, standing in bus for extended periods, or in moving vehicles. These tips of sight saving come from National Health authorities, at Ottawa.

Every child is color-blind at birth, and not until two-and-one-half years is the color vision fully developed.

## Pearl-Stringing Business Run By Sisters

Ethel and Constance Austen are reputed to be England's leading pearl specialists. The sisters went to the BBC microphone the other day to tell about the unique business which they have been running in Hatton Garden, London, for the past 15 years. Their father, a well-known London jeweler, died when they were in their teens and with his memory he left them. They bought their business and also qualified as Fellows of the Gemological Association.

This creature was known as machaerodus eohanis to its friends and relatives, and was about the size of a house cat.

What happened? In no time at all, say 10,000 years or so, tatty became extinct.

Well, you know how it is with women. Nature didn't give up.

The next time it was the sabre-tooth tiger. He was no relation to machaerodus eohanis, and he was built along the same general lines, but much bigger.

He lived in the ice age, and hence was a Johny-come-lately, the way the Smithsonian scholars measure time.

But the tiger fizzled out, too, and Dr. C. Lewis Gasin, vertebrate paleontology curator, told a reporter that nobody knows why for sure.

Climatic conditions change, animals are forced to migrate, and the first thing anybody knows is nature's balance wheel is out of kilter.

The sabre-tooth tiger, for instance, with its protruding tusks, was mighty handy at carving up mastodons. Gasin suspects that when the mastodons disappeared so did the tiger's lunch.

As for the other, Gasin doesn't even have an extinct theory,

### PATIENT READER

Olivia Illegans, accustomed to people who habitually scratch their comments in books, are scratching their heads over a reader who went through a 700-page novel underlining every preposition. Her score: 2,334-241. Another library borrower left his liquor ration book in a copy of "The Lost Weekend."

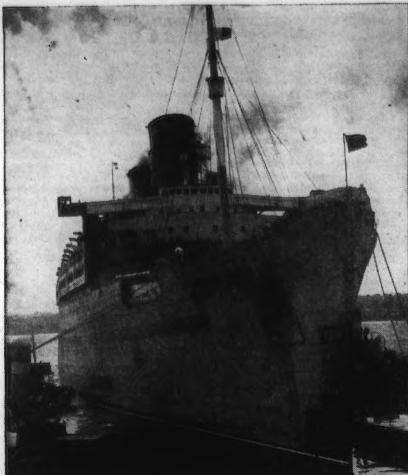

There is no rainy season in Puerto Rico.

PRESIDENT AND SON ENJOY COMICS TOGETHER—Sitting down together to read a comic section are President Miguel Aleman of Mexico and his son, Miguel, Jr., 14. They are seen in a New York hotel suite, where Mexico's chief executive found time to relax during his busy Manhattan schedule.

# World News In Pictures

LITTLE TUGS RESCUE GIANT SHIP—Seven tugs battled for an hour to keep the liner Queen Mary from crashing into the quay during recent heavy storm at Southampton. A strong wind started to swing the big liner toward the wharf. Tugs came to the rescue.

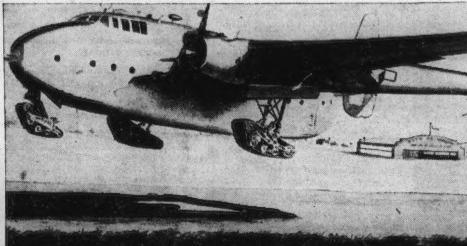

BAFFLING SOCIAL PROBLEM—Among Britain's most tragic legacies of the war are the 700 or more children of U.S. Negro soldiers and unwed British mothers. Usually unwanted by their parents, they are sent to foster homes, institutions, or are allowed to "just grow", like Topsy, in slums.

SAVED PAYROLL—Helen Tufford, cashier at the National Sewer Pipe Co. in Hamilton, saved most of the payroll when two masked men, one armed with a rifle, entered her office and demanded money. Miss Tufford dropped 29 pay envelopes in the vault, handed over 21 containing \$988. Most of the money was recovered when a suspect was arrested shortly after the robbery.

DON'T FORGET THE ONE ON YOUR HEAD—Counting his chickens is little Michael Brooks of Bristol, who seems to be having some difficulty keeping track of his downy friends as they won't stay still.

PLANE LANDING GEAR FOR MUD, DIRT OR SAND—New track type landing gear for planes in this revolutionary installation depicted in an artist's sketch. It will replace the conventional nose and main wheels and permit plane to land on soft dirt, sand or heavy mud.

ONE SAVED, ONE KILLED—Struck by train at Vaudreuil, Quebec, Clifford Kinner was hurled to safe landing. Another section hand, Robert Rodford, fell in Ottawa river and perished. Diagram illustrates incident.

TEACHER SAVES PUPIL FROM SERIOUS BURNS—Plucky teacher, Hazel Hutcheson, (left), is heroine to pupils at school in Hawtree, Ont. When dress of Georgina Redman, 10, (right), caught fire in schoolyard, Miss Hutcheson beat out the flames with her bare hands. Georgina says teacher is "swell".

FRENCH COLONIALS PUT COLOR INTO VE-DAY SHOW—Lending color to the celebration of VE-Day in Paris are these turbaned "Spahis", French colonial troops, on horseback in flowing capes. President Vincent Auriol asked farmers to bring their wheat to market to ease the country's acute bread shortage.

DOESN'T KNOW WHAT HE'S MISSING—Born with but one front leg, this bull calf can jump and run with the best of his four-legged brothers and sisters, according to his owner, Bernard Gerken, whose farm is near Hillsdale, Ill. This rarity occurs but once in several hundred thousand births.

DISCOVERIES MADE IN BAJA DESERT — After an exploration trip into the desert of Baja, California, little-known Baja desert, is held by Ernest, (left), and George Tinkham. White latex rubber flows freely from what may be new sub-species of lizard found there.

Rubber-bearing candelaria plant, discovered in the Baja desert, is held by Ernest, (left), and George Tinkham. White latex rubber flows freely from the plant.

JAP CITIZENS TURN OUT EN MASSE FOR FIRST ELECTION—Thrill of a democratic election night was enjoyed for the first time by Japanese citizens as they turned out in thousands to watch the bulletin boards on which returns were posted as they came in from Tokyo. This scene is outside the office of Asahi, Japanese newspaper, as crowds watched results in the Diet election.

## OUR COMPLETE SHORT STORY

## DARK CLOUD DRIFTING

By ROBERT H. SCANLON

SUDDENLY the typing started again and Kay's hands gripped the typewriter. Once she had tried to hear Hal typing. It had always sounded pure and smooth—like Hal himself, but now there was something fierce and desperate about it. Out there in the dark pergola Hal was tearing himself to pieces, trying to claw through blindness.

"It's like a black cloud between me and the typewriter, Kay," he'd said. "I'm bursting with stuff to write but the minute my fingers touch the keys I go blind clean through."

The typewriter stopped and he heard his curse as he crumpled the paper in his hands. Then he put in another sheet and the mad, plunging rhythm resumed.

"I've only turned on the light," she whispered, "at least for my sake." That's what she had meant. Hal was now working in the dark, fighting the dark, being tortured by it.

Again the typing stopped, but this time Kay didn't hear the whirr of the roller and the angry crunch of paper. Hal was silent, and she could see him over the typewriter. In the old days that meant he was fighting with an idea, but now it meant that an idea was beating and pounding him. Hal was proud, too proud for his own good. She had wanted to laugh so hard at him, but her jaw sat tight, her eyes tight, and when she'd plead with him to come to bed he'd shake his head slowly.

"I can't sleep. I've got to write one good thing that isn't awkward and clichéed, and I've been groping through a lighted room."

Kay leaned on the railing, listening intently, but no sound came from the pergola. She turned and slipped quietly down the steps and across the yard.

In the thicker gloom of the pergola she caught the pink glint of metal and Hal's form slumped over the typewriter.

"Hal," she called softly. Then she opened the door and snapped on the light. She bent over her husband and shook him gently. "Hal, are you asleep?"

"No," he groaned, "Leave me alone."

Hal's voice frightened her. "What were you writing tonight, honey?" she asked and sat down beside him.

## Do you suffer MONTHLY FEMALE PAIN?

This fine medicine is very effective to relieve monthly female pains, cramps, "dragged out" feelings of each day—when due to functional disorders—diabetes, & weak kidneys.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

## Delicious CRUMB COFFEE CAKE

## Recipe

Add 1 envelope Royal Fast-Rising Dry Yeast and 1 teaspoon sugar to 1 cup warm water; stir and let stand 10 minutes. Scald  $\frac{1}{2}$  cup milk, add 3 tablespoons shortening,  $\frac{1}{2}$  cup sugar, 1 egg, 1  $\frac{1}{2}$  cups flour, cool to lukewarm. Add 1 cup sifted flour to make a batter. Add yeast mixture and beaten egg. Well. Add 2  $\frac{1}{2}$  cups sifted flour, or enough to make a soft dough. Knead lightly; place in greased bowl, cover with cloth. Let rise until doubled in bulk, about 2 hours. Roll out dough  $\frac{1}{2}$  inch thick; cut in squares. Place in a shallow pan. Let rise in warm place, free from draft, until light; about 1 hour. Prick each square with fork and brush with 3 tablespoons melted shortening. Cream 3 tablespoons butter; add 1  $\frac{1}{2}$  cups flour, add 3 tablespoons sugar gradually, mixing well. Add  $\frac{1}{2}$  cup sifted flour,  $\frac{1}{2}$  cup dry, fine coffee, 1  $\frac{1}{2}$  teaspoons cinnamon; stir until well mixed and crumbly. Sprinkle on top of cake. Let rise again, about 1 hour. Bake in moderate oven at 400° for about 20 minutes.

## SELECTED

## RECIPES

## CARAMEL CUSTARD PIE

$\frac{1}{2}$  recipe Pie Crust  
1/2 cup sugar, crystallized  
1/2 cup cream  
3 eggs, slightly beaten  
1/4 teaspoon salt  
6 tablespoons sugar  
1/2 teaspoon vanilla

Line a deep 9-inch pie plate with pastry rolled  $\frac{1}{2}$  inch thick, allowing to extend 1 inch beyond edge.

For custard, beat 1 whole egg.

Add caramelized sugar slowly to scalded milk, stirring constantly. Cool to room temperature. Add milk, stirring constantly. Pour into pie shell.

Bake in hot oven (425 deg. F.) 25 to 30 minutes, until knife inserted comes out clean. Cool.

To caramelize sugar, heat it slowly in a small kettle, stirring constantly until it turns brown and begins to burn. (Takes about 5 minutes.) Remove from fire.

## Farm Style Chicken Stuffing

Combine 2 cups biscuit or bread crumbs and 2 cups corn bread crumbs. Add  $\frac{1}{4}$  cup chopped onion,  $\frac{1}{2}$  cup diced celery,  $\frac{1}{2}$  cup diced green pepper,  $\frac{1}{2}$  cup sliced black olives,  $\frac{1}{2}$  teaspoon sage, and 4 tablespoons cold butter, diced.

Add 1 slightly beaten egg and mix lightly.

Stuff into cavity of chicken.

Roast in moderate oven for 3 to 4 hours.

For more information, see page 14.

## This Motor Coach

## Really Luxurious

The small place industry may be faced with competition from bus builders, suggests the Wall Street Journal. An attempt is being made to persuade the corporation executive to forgo the company-owned plane for a luxury motor coach. One of the first to receive a hit the other day was Hugh Drane, president of Hugh Drane Ice Factories, Inc., Corsicana, Texas. He will take delivery on a gleaming white, 35-foot, five berth motor coach, which will travel the 1,000 miles over which his plants are spread. He formerly flew. Costing between \$45,000 and \$50,000, the coach is air-conditioned. It has an intercommunication system in addition to radio telephone. The coach contains two staterooms, each with two full-sized berths. The master stateroom has a shower, toilet and washbowls. The guest stateroom gets along with a toilet and bowl. Between the two rooms is a large-sized galley, with an ice box, four-burner stove, and sink. There's plenty of closet space as well as a spacious rear luggage compartment.

## Lets' Chat Awhile

By TALL OAK

I should not be surprised if you should become a little impatient at my frequent reiteration concerning the duty of parents to their children.

But when one is constantly faced with the dreadful reality of juvenile delinquency and when one finds good reason to believe that there is a lack of honest culture, then one feels that still another word would not be amiss.

It seems that home in some cases has lost its appeal. It is just a place where one can go to eat and sleep. No warmth of understanding, no homeliness to attract. Just a cold, master-of-fact place where in some cases there are constant arguments and displays of temper.

Dad is no longer a respected pal. He is too busy to take time to understand and talk with his son. Mom is not well, she is someone else—a woman of the world. She no longer accepts her responsibility as a molder of lives of future citizens. Besides she is doing it all for herself. She wants to do it her own way. To make this world a better place to which to live, for

Today she lunches with the Social Committee; With statistics and news she has

mag.

Then she dashed to a tea on "Crime in our City". And closed with the Church Ladies Guild.

On Tuesday she went to a Babies' Workshop. And then on "Good Citizenship". At dinner she spoke to the trade union branch. And there wasn't a date that she didn't have.

On Wednesday she managed, two annual dinners,

One of noon and the other at night. On Thursday a luncheon on "Bootlegging sinners". And dinner on "War, is it right?"

"World problems we face" was the Friday noon date. And a luncheon address, as you guess.

Then she wielded a fork while a man from New York Spoke at dinner on "Social Unrest".

On Saturday noon she fell in a brook. Missed a speech on "The Youth of our Land". Poor girl, she was through, for she never came to.

But she died with a spoon in her hand.

Now don't misunderstand me. I do not advocate that parents should become martyrs to the home. I am merely pointing out that No. 1, don't ask you to become a Mr. and Mrs. Do-Nothing. But I do plead with you to give your children and your home the time and the love that God has too busy to attend to your God given task of molding the characters of your children.

After calling a little child to him, Jesus said, "who so shan off from me, let him not be better off." In me, it was better for him to be hanged about his neck, and that he were drowned in the depth of the sea. Matt. 18-6

Can anyone do more harm to a child than can be done by parents failing to give their children the right kind of environment.

June 24th—

It is only by labour that thought can be made healthy, and only made happy.

It is only by thought that labour can be made healthy.

—Ruskin.

## 2-4-D Good for Farm Pastures Stock Unaffected

Farmers who plan to spray their pastures with 2-4-D weed killer this summer will be interested to learn that experimental work carried out last year by the U. S. Department of Agriculture indicates the amount of this material required for the destruction of the usual pasture weeds is not injurious to grazing livestock.

Both cows and sheep were used in the tests. The former were pastured continually on the treated herbage for 165 days and the latter for 12 days. Although close grazing was general over the whole area during these periods, there was no sign of ill effect to the livestock or to the palatability of the grass.

In a further check of the results, the scientists added 2-4-D at the rate of 8.5 grams, approximately one teaspoonful, to the daily ration of 100 lbs. for 105 consecutive days.

To complete the test, they took a chemical test on the milk and blood of the cow and the blood of a calf that was fed on the milk. In neither was there any sign of 2-4-D secretion or abnormal performance.

At the same time that the American experiments were in progress, English researchers were carrying on a similar study of the effects of "Methoxone", another hormone type of selective weed killer and

report equally satisfactory results. Cows did not suffer any disturbance when given great concentrations in a field when eaten heavily. Applications of "Methoxone" had been made.

While the U. S. scientist caution that their experiments were based upon the assumption that either type of weed killer can be applied to soil and a valuable aid in the development of better pastures when used according to the directions.

June 25th—

I live for those who love me  
For those who know me true  
For the Heaven - that smiles  
above me  
And aways my spirit too

## IMPORTANT GOVERNMENT NOTICE Respecting Price Control

The following list is a convenient summary of the Wartime Prices & Trade Board Order No. 737 and is published for the protection and guidance of the public. It does not give the full text of the Order. For full details reference should be made to the Order itself.

CLIP THIS AND KEEP FOR EASY REFERENCE

### Summary of

### GOODS AND SERVICES REMAINING SUBJECT TO MAXIMUM PRICE REGULATIONS

As set forth in Wartime Prices & Trade Board Order No. 737—effective June 9, 1947

#### FOODS

- All flour, flour mixes and meals.
- Yeast.
- Fresh bread rolls, and bakery products.
- Biscuits, except those completely covered with chocolate.
- Processed cereals, cooked or uncooked, including breakfast cereals, muesli, cornflakes, spaghetti, noodles and other alimentary paste products.
- Butter, except wild rice, pot and pearl barley.
- Shelled corn, both raw and including popping corn.
- Dried beans, except lima beans except lime beans and red kidney beans.
- Starch.
- Sugar, sugar cane sugars, corn syrup, grape sugar, glucose.
- Edible molasses.
- Tea, coffee, coffee concentrate.
- Malt, malt extract, malt syrup.
- Black pepper and white pepper and substitutes containing black or white pepper.
- Salads and cooking oil.
- Raisins, currants, prunes, dried fruit.
- Tomatoes, tomato sauce, tomato paste, tomato pulp, tomato puree, tomato catsup, chili sauce, when made wholly or chiefly of tomatoes, except mechanically sealed cans or glass.
- Canned pork and beans, canned spaghetti, macaroni and vegetables.
- Canned corn, canned field beans excluding the lime and red kidney varieties.
- Canned fruits, canned pears.
